# Telephony revolution

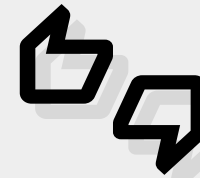

## 01 Analog/Digital Signal

This era, telephony system is rely on how signaling and connectivity work, the more good signal and connection the more quality.

## 02 Info/Message ERA

Coming of IP based standard, the telephony system is more flexible, usable and high quality but complicate and high engineering.

## 03 Service Based

Simplify the complicated IP telephony system using Cloud service. User can gather all benefits buy just paid as electricity fee.

# Communication Changing Fast

## Voice

From Yodel Shouting to traditional  
telephony

## Voice over IP

Faster, more distance, higher quality  
together with data

## Video conference

Real-time motion image, voice and  
document

## Email

Text, message, picture, no interactive

## Chat

Text fast, no formal

## Avatar

Multi verse more senses, more meaning

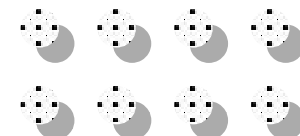

# Office Phone Still in need, just on difference approach

## Needs

- Replace or upgrade old PBX
- More flexible workplaces
- Multi-devices involved
- Integrated to other system
- More OPEX less CAPEX
